REGIONAL ARCHIVES IN OPAVA

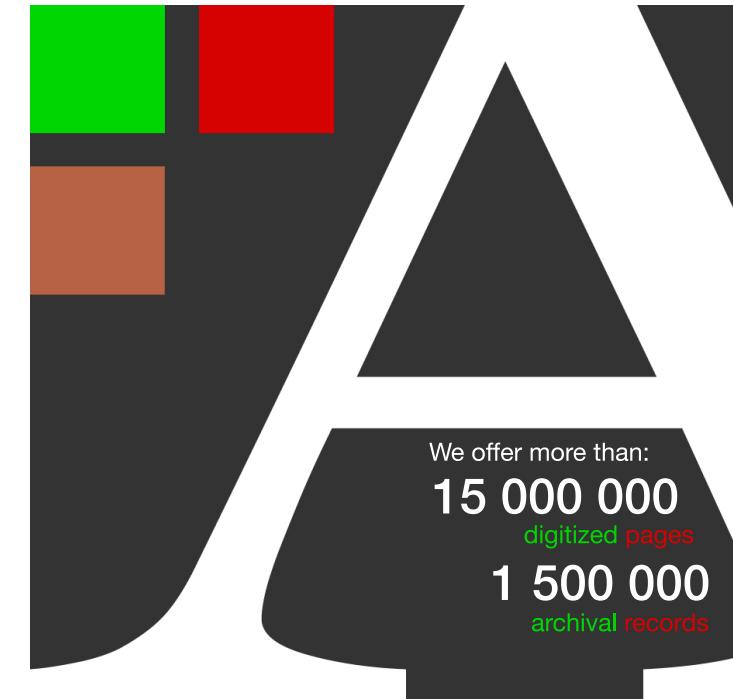

The Regional Archives in Opava is the third oldest and the third largest state archives in the Czech Republic. It serves as regional state archives for the territory of former North-Moravian Region, at the same time it is also a historical archives for so-called Austrian or Czech Silesia.

This is reflected both in the structure of documents stored in the archives, as well as in institution's structure with the headquarters in Opava and a branch in Olomouc. Since 2002 the organization includes also all state District archives on the territory of the Moravian-Silesian and Olomouc Regions. Regional Archives also methodically manages the Ostrava City Archives and other accredited archives in the two Regions.

Zemský archiv
v Opavě

The Regional Archives in Opava shares information about content of archival fonds and collections to all users, including digitized copies of archival materials.

This is happening since 2009, when we offered the first version of internet database Archival Vademecum.

Now launches a brand new application with digitized archival materials. We introduce the Digital Archives of Regional Archives in Opava.
